Professional Summary

Full Stack Developer with hands-on experience in front-end and back-end technologies, including React.js, Node.js, Python, JavaScript, SQL, HTML, and CSS. Proven ability to thrive in startup environments, contributing to product development, content creation, and automation pipelines using AI APIs. Experienced in building end to end features under tight deadlines, with strong skills in end to end feature development, testing, bug fixing, prompt engineering, and cross-functional collaboration.

Work Experience

Full Stack Developer at Faintlines – May 2022 – Aug 2025

• Created and maintained automation pipelines for content generation with Gen AI APIs.
• Built development tools, CLI utilities, and external websites to streamline workflows and support the dev team.
• Acted in a hybrid role in an agile workplace: Full Stack Developer, Project Manager, Content Creator, and Tester.
• Oversaw the creation and implemented new game missions, including any features they required, ensuring releases on a bi-weekly schedule.
• Owned features end to end from conception to production across the client and backend.
• Wrote tests for all code added and added tests where missing.
• Released a new game prototype within 1–2 months, meeting aggressive deadlines.
• Proactively fixed bugs, improved code stability, conducted code reviews, and merged multiple pull requests daily.

Software Development Intern at iintoo – Feb 2022 – Mar 2022

• Built React-based dashboards and user forms, integrating with SQL data sources.
• Designed and optimized SQL queries to support data-driven features.

Education

Full Stack Development Bootcamp Appleseeds Academy | Sep 2021 – Mar 2022

• Completed intensive program covering JavaScript, React.js, Node.js, HTML, CSS, and SQL.
• Gained hands-on experience in full-stack project development, teamwork, and agile workflows.

Skills

• Languages & Frameworks: JavaScript, Python, React.js, Node.js, HTML, CSS, SQL
• Testing: Jest (unit & integration testing), Pytest
• Tools & Platforms: Git, CLI tools, AI APIs, Automation Pipelines
• Other Competencies: Content Creation, Project Management, Testing
• AI Tools: Cursor, Claude Code
